+V,-V	M3.5	12Kgf-cm

- NOTE: 1. The voltage difference among each output should be minimized that less than 2% is required.  
 2. The total output current must not exceed the value determined by the following equation.  
 (Output current at parallel operation) = (The rated current per unit) × (Number of unit) × 0.9

■ Mechanism of Output Modules

©MD-100

Output Connector(CN41) : JST B2B-ZR or equivalent

Pin No.	Assignment	Mating Housing	Terminal
1	+RC	JST ZHR-2 or equivalent	JST SZH-002T-P0.5 or equivalent
2	-RC		

Assignment	Screw Size	Maximum mounting torque
+V,-V	M4	18Kgf-cm

- NOTE: 1.Remote ON/OFF of CN4 turn ON/OFF the entire power system  
 2.Remote ON/OFF of CN20,CN33,CN41,CN51 turn ON/OFF the individual output module  
 3.SVR1-5: DC output voltage adjustment(SVR4 for CH2 of MD-100,SVR5 for CH1 of MD-100)

■ Static Characteristics

■ Remote Margin / V-Program

Remote Margin / V-Program is available for MS-210 and MS-360 to fine tune the output voltage. Hereunder is the instruction, assuming no voltage adjustment is applied via the built-in potentiometer.

- When the function is not required, please have pin CN7-8 (refer to Mechanism of Output Modules) open, and the output voltage will present the nominal voltage.
- Connecting pin CN7-8 with CN7-6 (or CN7-7) will tune the output voltage up (if CN7-7, down) by 5% of the nominal voltage.
- Applying an additional 100K  $\Omega$  potentiometer across CN7-6 and CN7-7 (referring to Figure 1) will enable the adjustment in between -5% and +5% (EX: -3%, +2.5%, and etc.)

Figure 1

(Please refer to Mechanism of Output Modules)
